

Etsuro Series

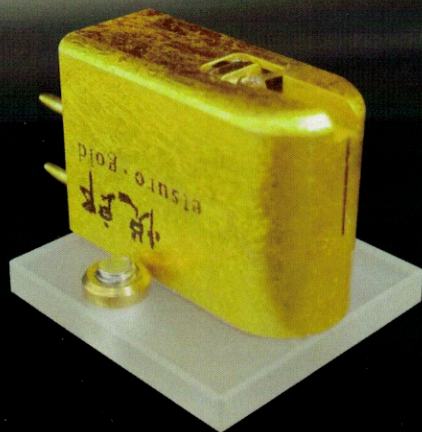

Japanese Traditional Crafting Techniques

A superb product, combining **Japanese** technology and tradition.

Gold

The Etsuro Gold represents the top of the MC cartridge models and has been created to provide supreme sensation to the audiophiles around the world. Faithful to the basic engineering, the

Etsuro Gold has absorbed over 40 years of cartridge manufacturing experience of Excel Sound. Etsuro Gold model features the diamond cantilever and due to the diamond's hardness characteristics, the vibration transmittance speed can be increased to improve the sound quality. At the same time, unnecessary resonance is reduced to emphasize the transparency of the reproduced sound.

Bordeaux

The Bordeaux uses the stylus with the contact surface of 80 μ m 「Super micro line diamond chip, which accurately traces the ultra-precise groove. This special stylus is aimed to play the sound recorded on the record in its true colors.

The sapphire pipe material has been chosen for the cantilever. By using sapphire which carries superb sound transmission character and hardness, the Bordeaux achieved vibration transmittance in high speed without creating any distortions.

Cobalt Blue

The Cobalt Blue uses the Microline tip stylus possessing ideal curvature of 80 μ m contact surface against the record groove. This contact surface achieved a superior reproduction characteristic. Cobalt Blue has been created to naturally reproduce the sound cut on the record.

Ultra-precise Sapphire pipe material has been introduced for the cantilever.

The remarkable hardness of the sapphire will help reduce distortions and is also superb in the transmission of high speed vibration to create an increasingly clear sound.

CONCEPT

The Etsuro series are low-volume production items that are produced one by one with full care by skilled craftsmen using carefully selected materials. The surfaces of the cartridge housings have gold leaf and lacquer applied, thereby imbuing the cartridge with the Japanese culture that has been passed down from ancient times to the present.

This crafting technique is similar to that used in the architecture and art objects of shrines and temples in various parts of Japan, and we were able to create a product with brilliance and class, which high-end audio equipment deserves to have. Please prepare the Etsuro series, combined with performance and quality, for use by every audiophile around the world.

SPECIFICATIONS	Gold	Bordeaux	Cobalt Blue
Frequency response	10-50,000Hz	15-50,000Hz	15-50,000Hz
Output voltage	0.3mV/1kHz	0.25mV/1kHz	0.25mV/1kHz
Output balance	< 0.3dB/1kHz	< 0.5dB/1kHz	< 0.5dB/1kHz
Channel separation	33dB/1kHz	33dB/1kHz	33dB/1kHz
Tracking weight	2gr	2gr	2gr
Impedance	4Ω/1kHz	3Ω/1kHz	3Ω/1kHz
Trackability	> 70μm/2gr	> 70μm/2gr	> 70μm/2gr
Stylus shape	Special polished 80μm microline diamond	80μm microline diamond	80μm microline diamond
Cantilever	0.22mmφDiamond	0.4φsapphire pipe	0.4φsapphire pipe
Cartridge base	2.5mm pure sapphire plate	2.5mm Sapphire Plate	Extra super duralumin(A7075)
Cartridge housing	Extra super duralumin(A7075)	Extra super duralumin(A7075)	Extra super duralumin(A7075)
Housing processing	24K Gold leaf "Kinpaku" finish	Special GradeUrushi Handmade	Urushi handmade
Terminal pin	24K Gold plated	Gold plated	Rhodium plated
Cartridge weight	8.7 grams	9.0 grams	8.1 grams
Content	Warranty card, Instruction manual (Dimensions, specifications), Stylus brush, 2 mounting screws	Warranty card, Instruction manual (Dimensions, specifications), Stylus brush, 2 mounting screws	Warranty card, Instruction manual (Dimensions, specifications), Stylus brush, 2 mounting screws
Box Material	Walnut	Paulownia aulownia	Paulownia
