JP30 MC MKIII

Jadis

JP30 MC MKIII version is characterized by several improvement such as, Lundhal Step Up transformers on MC stage, regulations by tubes for high voltage, new design for PC board (double side, 70 microns copper), Output stage capacitor specially designed for us. It's now possible to use several capacitors technology in the phono reaction loop in order to fine tune the sound. On line stage, an optional and configurable attenuator has been interleaved in case of difficulties with potentiometer used. A new improved version which will bring a beautiful musicality to your music
